

# Using TurboStats & StatBroadcast Quick-Start Guide

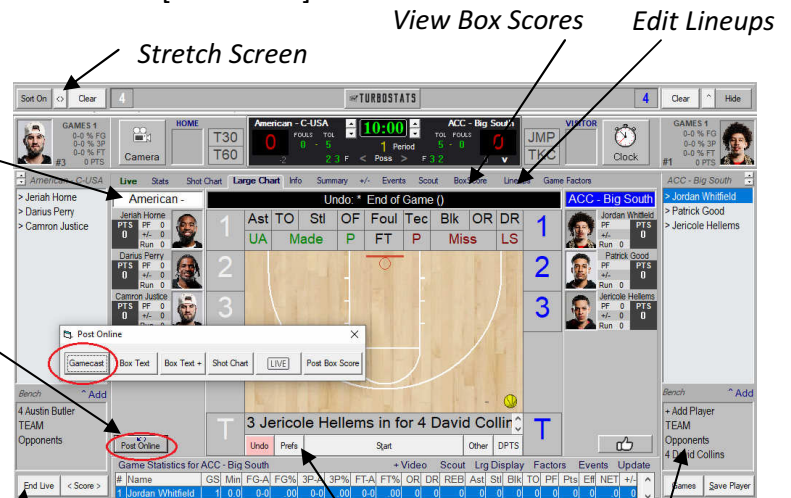

1. Press [Open Existing Team] in TurboStats and select the team you want on the left side of the live scoring screen. Press [Open].

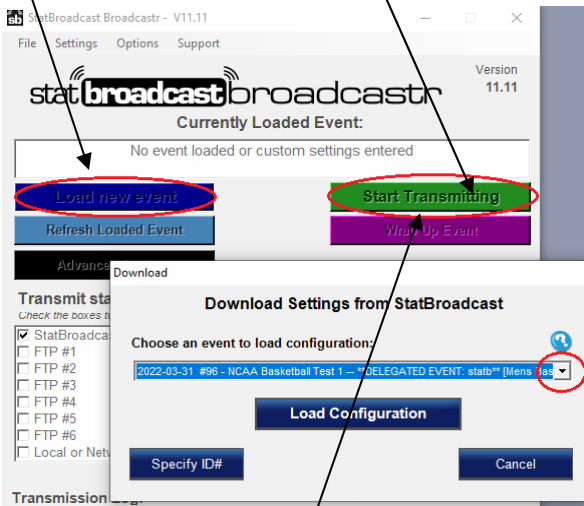

2. Click on [Games] from the top menu and select the game in list you are scoring. You can change date/time if needed.
3. Press [Live Score].

Double Click to Change Team Colors, Single Click or drag-n-drop to Sub

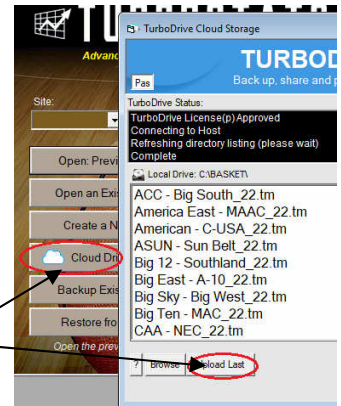

4. Press [Post Online] > [Gamecast] to create the file turbostats.xml
5. Now you can load next game in StatBroadcast that you want to transmit your live XML feed.
6. Select the turbostats.xml file from the folder c:\basket, then press [Start Transmitting].

7. If there are any settings you need to change in TurboStats, press [Prefs].
8. Double click players from the bench to load the starting lineups. If you make a mistake press [UNDO]
9. Score the game
10. When the game is over press [End Game] and you will be prompted to finalize the game.

11. **Important!** Press the [Upload Last] button to post the last two team databases to the Cloud

12. Press Stop Transmitting in StatBroadcast
13. Repeat Step 1 for the next game

Tip: If game is not transmitting press the StatBroadcast icon to look for pop-ups
